Q 19 Barton Creek Street, Belmopan City, Belize

SUMMARY

A geoinformatician with over five years of experience in proprietary geographic information systems (GIS), free and open-source GIS, spatial data programming, spatial database management, remote sensing, earth observation, and spatial data engineering.

EXPERIENCE

Geographic Information Systems Assistant,

Statistical Institute of Belize

■ September 2022 – Present • Belmopan, Belize Administer and maintain Enterprise GIS, spatial databases, services, and Web GIS applications.

- Administer and maintain spatial databases on PostgreSQL database with PostGIS extension.
- Administer and maintain web applications on free and open-source software for geospatial (FOSS4G): GeoServer & Mapstore2; and on commercial off-the-self (COTS) software: Portal for ArcGIS & ArcGIS
- Create tools to automate and standardize the extraction, transformation and loading of non-spatial data and spatial data into SIB's spatial data repositories.

Geographic Information Systems Technician,

Statistical Institute of Belize

■ July 2018 – September 2022 Belmopan, Belize

Create spatial data using front-end geospatial software and produce maps.

- Perform Earth Observation Remote Sensing Techniques to detect changes in urban areas.
- Process aerial photos from drone imagery in QGIS and ArcGIS Pro.
- Automate the generation of spatial data with R programming language using OGC Standards.

Geographic Information Systems Technician,

Coastal Zone Management Authority and Institute of Belize

May 2017 − June 2017

Pelize City, Belize

Assist CZMAI with data creation and field data collection.

- Heads-up digitized and updated building footprints for Caye Caulker using Google Earth Pro and existing building footprints.
- Assisted with the collection of land use and building information in Caye Caulker using Open Data Kit for android devices.

EDUCATION

B.Sc. in Natural Resource Management

University of Belize

■ 2012 – 2014

Q Belmopan, Belize

SKILLS

R | Python | ArcGIS Pro | QGIS | Data Engineering | Remote Sensing | Earth Observation | PostgreSQL PostGIS | FOSS4G GeoServer | Geovisualization and Geocommunication | WebGIS

ACHIEVEMENTS

Enterprise GIS in FOSS4G

Developed and implemented an Enterprise Geographic Information System infrastructure exclusively with free and open-source software for geospatial: QGIS and PostgreSQL Database with PostGIS extension.

Web GIS in FOSS4G

Deployed and maintained Open-Source GeoServer and Mapstore2 with Apache Tomcat on Apache HTTP Server on SIB's GIS Servers.

Web GIS Development: Full-**Stack PERN Application**

Built and maintained PostgreSQL, Express, React, Node.js geoportal to geovisualize the Statistical Institute of Belize's spatial data.

GIS Web Application for Census Progress Tracking

Geovisualized census progress coverage by creating a web application using open standards: Mapstore2 web created using GeoServer, PostgreSQL database with PostGIS extension and ETL process automated with R programming.

Created {rvr2spatial}

A package in R programming designed to facilitate the ETL process from MariaDB to PostgreSQL PostGIS.
